EXPERIENCE

Smart City, Aurangabad Gov.

Lead Full-Stack Developer | November, 2022 - February, 2023

- Successfully managed and led a team of 7 developers throughout the project, ensuring smooth coordination and timely delivery of the application before G-20.
- Developed the Smart Scan application using full-stack technologies such as ReactJS and Flask.
- Collaborated with ASI, the Smart City, including government officials, to gather requirements and incorporate their insights into the application's design and functionality.
- Handled the entire deployment and provided technical support and troubleshooting assistance to the officials, addressing their queries and resolving any issues promptly.
- Received recognition for the successful completion of the application, contributing to the enhancement of tourism experiences in Aurangabad and promoting historical knowledge among visitors.

Oasis InfoByte

Java Developer Intern | June, 2022 - July, 2022

- Learned and implemented advanced technologies of Core Java and concepts of OOPs.

Rinex.Ai
